POWERFUL SOLUTIONS TO TAKE YOUR BUSINESS TO THE NEXT LEVEL.

With enterprise-grade technology, flexible packages and affordable prices Shaw Business has the solutions to support your business – all backed by 24/7/365 customer support.

Shaw) Business
Authorized Partner

All Business Internet packages have access to 450,000+ Shaw Go WiFi hotspots.

SmartWiFi

With three separate networks, keep sensitive data on a different network than your customers are using to browse the web, all while keeping your speed. Having multiple networks doesn't affect your network capabilities.

Help serve your customers better by understanding when and how long they're on your network with SmartWiFi analytics.

With advanced WiFi access points, you can be sure that we've got you, and every square foot of your business covered with connectivity.

Cloud management allows you to receive seamless over-the-web feature upgrades and device updates.

BUSINESS INTERNET GIGABIT	**12** DEVICES	**1** GBPS	**150** MBPS	✓	**10**	✓

*Connection speeds may vary based on modem equipment, client device capability, building wiring, internet traffic and environmental conditions. "Maximum" speeds are based on optimal conditions. Maximum download speed for a single hardwired device connection is 940 Mbps. Additional wired or wireless device connections are required to reach maximum download speeds of up to 1Gbps (i.e. 2 x devices concurrently running at 500 Mbps each). Business Internet and SmartWiFi 300, 750 and Gigabit upload speeds vary by region and will be either up to 125 Mbps or up to 150 Mbps, depending on network infrastructure in your area.

SmartSecurity

Keep your network safe from threats while you easily manage access.

CLOUD MANAGED:
Access a comprehensive dashboard to view and manage your network from anywhere* at anytime.

BUSINESS-GRADE FIREWALL:
Ensure only the network traffic you want enters or leaves.

APPLICATION CONTROL:
Set network policies for employees and guests by choosing which specific applications are permitted to access your system.

ADVANCED THREAT PROTECTION:
Help protect your business against the latest viruses, malware and malicious hackers.

CONTENT FILTERING:
Choose what types of web content are permitted or denied within your network (e.g. gambling, adult content).

SECURE MULTIPLE LOCATIONS:
Connect multiple offices together and share files safely through a secure Virtual Private Network (VPN).

SAFEGUARD REMOTE WORKERS:
Provide a secure VPN connection for your remote workers to access business files.

LTE BACKUP

LTE Backup provides a reliable backup Internet connection so that in the rare event of an Internet outage, your business remains operational.

SmartTarget

Turn your guest WiFi into a powerful marketing tool with SmartTarget. Use real-time customer insights and data to create custom marketing campaign including email, digital, surveys and coupons.

All Business Internet packages have access to 450,000+ Shaw Go WiFi hotspots.

SmartSurveillance

Give your business access to cloud-based security cameras, professionally installed with secure encryption.

HD cameras that are encrypted and work without additional software or expensive servers.

Manage cameras and settings through the online dashboard – the same one used for SmartWiFi and SmartSecurity.

Seamless cloud software updates are automatically pushed to your connected SmartSurveillance cameras.

Motion heat mapping and people-counting technologies allow you to optimize your merchandising and business strategies based on activity patterns inside your business.

SMART REMOTE OFFICE

Seamlessly and securely connect remote employees to your head office for secure access to corporate apps and data. It's like working in the office from anywhere*.

FIBRE BASED SOLUTIONS

We offer high-performance cost-effective and secure fibre based solutions including MPLS (EVPL, VPLS and E-Line) and Wavelength.

FIBRE INTERNET

FIBRE GATEWAY (BUNDLED SERVICE)

Shaw Fibre Gateway is a cost-effective bundle that connects your business to our industry-leading Internet backbone while providing the reassurance of Service Level Agreements.

- A robust fibre-fed network to provide symmetrical upload and download speeds
- 10 Mbps, 100 Mbps, 1G and 10G bandwidth options for maximum flexibility
- Over 1,100 peering connections to ensure traffic arrives at its Internet destination faster
- Access and usage bundled in one convenient package
- Flat rate, burstable, and metered billing options

ETHERNET OVER DOCSIS

Ethernet over DOCSIS connects all your locations to allow remote teams to collaborate as if they were in the same office.

- The speeds you need—available with symmetrical 5, 15, 30 and 100 Mbps access.
- Stay safe. Mitigate the threat of malicious attacks over the Internet with this private-network connection that never connects with the public Internet.
- Combines the simplicity of Layer 2 Ethernet with the reach of Shaw's extensive broadband infrastructure.
- Worry not, EOD is designed to effectively carry all data and applications over our robust MPLS network.

*Where an Internet connection is available

SmartVoice

Answer your important calls effortlessly, mobilize your workforce and choose how you want to answer your calls, selecting from your desk phone, mobile device or computer.

Auto attendant's recorded message provides exceptional customer service and directs calls to the right recipient

Work remotely and collaboratively with video conferencing, chat and document sharing

Transition phone calls between the office and your cell phone, with the press of a button

The Mobile App syncs mobile devices to receive and respond to communications from anywhere*, anytime
